SUMMARY

Hi! I'm Faith, a highly motivated penultimate-year student studying at Singapore Management University majoring in digital cloud solution. I am fervently passionate about utilizing technology to drive innovation and efficiency in various industries.

With a solid foundation in programming, coupled with experience in both front-end and back-end web development, I am eager to channel my skills and enthusiasm into a fulfilling Software Engineer role. My hands-on experience in building multiple websites and database management during academic projects has equipped me with the knowledge and agility required in the fast-paced tech industry.

I look forward to connecting with professionals and peers who share a passion for leveraging technology to create cutting-edge solutions!

WORK EXPERIENCE

Technical Support Staff

NTUC First Campus

June 2022 - July 2022, Singapore

- Onsite IT Support staff for SkoolNet 2 Hypercare, a new childcare management system for MyFirstSkool centres.
- Provided timely support on time-critical modules such as check-in and check-out
- Troubleshoot system bugs encountered
- Escalate issues encountered

PROJECTS

Personal Portfolio Website

<https://faithang.netlify.app/>

- Responsive Portfolio Website Using HTML CSS & JavaScript
- Smooth scrolling in each section.
- Includes a dark and light mode.
- Developed first with the Mobile First methodology, then for desktop.
- Compatible with all mobile devices and with a beautiful and pleasant user interface.

Property Bidding Website

- Haven is a one-stop property bidding platform, developed by our team using the Microservices Architecture, Flask, Docker and Vuejs.
- Each microservice represents a specific business capability, enabling seamless browsing of property listings, appointment booking, and real-time property bidding through our user-friendly interface.
- We also developed REST APIs to ensure smooth and efficient communication between services.
